

Sweatin' to the oldies?

So I was out joggin today and had [Robert Hood's Xlr8r mix](#) in and man did it have my feet moving, Mr. Hood has not slowed down and neither has his techno. Check it for some slammin' tracks via his discog and some newer tunes. There's another mix I've been enamored with over the last few weeks while makin' turns on the bike or sweatin' over the bridge. [Juan Atkin's LWE mix](#) is packed with slamming goodness. The mixing is by no means pristine but the bounce is there and that's what makes a crowd move, there is also a really good interview from the father of techno. It really reminds me of the first time I saw him, my legs could not stop dancing.
